· **Respiratory protection:**

Filter AX

For good ventilation provide, this can be achieved by local or space exhaust. If the concentration lies over the job limit values, then, a certified respirator suitable for this purpose must be used.

· **Protection of hands:**

Check protective gloves prior to each use for their proper condition.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Check the permeability prior to each renewed use of the glove.

For the protection against chemicals in areas with heightened risk of injury (mechanical hazard) no recommendation for a suitable glove material can be given.

· **Material of gloves**

Butyl rubber, BR

Recommended thickness of the material: $\geq 0.7 \pm 0.1$ mm

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· **Penetration time of glove material**

Value for the permeation: Level $\leq 6 < 480$ min

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· **Eye protection:** With danger of the eye contact closing eye protector.

· **Body protection:** Protective work clothing
